Web Frameworks Continued – User Input

JULY 12, 2021

Learning Objectives

At the end of this lesson, you should be able to:

- Create a website form
- Validate user input with clear error messages
- Save form data to a database

What are some user-input forms?

What are some user-input forms?

- Registration forms

- Log in forms

- Contact Us forms

- *Small pieces of websites like search boxes can be forms underneath!*

WT Forms

- Plugin for Flask that eases the process of creating forms

- Install on terminal using: *sudo pip3 install flask-wtf*

Flask

- Easy to use, lightweight, customizable

- Install on terminal using: *sudo pip3 install Flask*

- Serves a web page as opposed to normal print statements
